PROJECTS

Beam

- Chrome Extension to share your streaming accounts with your friends without giving out your passwords
- **Tech Stack:** Javascript, Firestore, Express, NodeJS, EJS, JQuery

Smart Locking System

- Smart lock for homes implementing NSDT as its chief aspect. This was my Final Year Project at K J Somaiya College of Engineering.
- **Tech Stack:** Flutter, Python, Chirp, Firebase (Firestore, Cloud Functions)

Outfit Planner

- Android application to assist color blind people in selecting their daily outfit.
- **Tech Stack:** Android Studio; Heroku; Python- Flask, Webcolors

Travnal

- Social Media and travelers are something that goes a long way together. So rather than travelers adjusting their content for social media. We decided to build social media tailor made for their needs.
- **Tech Stack:** EJS, NodeJS, MongoDB, CSS, JavaScript

Expense Manager

- Expense manager for an individual as well as for group expenses. Major feature was using OCR to get the bill amount and restaurant name. Worked on this during KJSCE HACK 2019.
- **Tech Stack:** HTML, CSS, JavaScript, PHP, MySQL

WORK EXPERIENCE

JUNE – JULY 2020

Halara Labs Private Limited *Full Stack Developer*

Worked on MongoDB, Express, NodeJS backend and Flutter frontend for online games application Play Hatke.

JUNE – JULY 2019

K J Somaiya Resource Centre for PWD Students *Android Development Intern*

Worked in a team of three under Dr. Prasanna Shete to develop android application which assists color blind people in selecting their daily outfit.
